

AFT 40K Air Rotational Handgun

3 type spray heads at the front are replaceable according to different working conditions, which reduces the working strength and improves work efficiency. The cleaning efficiency is 1.5-2 times that of the traditional rotary nozzle. The speed of removing iron rust can reach up to 30-50 square meters per hour, and the speed of removing epoxy resin paint can also reach up to 15-20 square meters per hour.

- Powder coated and anodized
- Lasting parts
- Adjustable nozzle rotation speed
- Lightweight
